

ADP Workforce Now[®] Carrier Connections

Looking to automate your benefits enrollment with your insurance carriers? ADP Workforce Now Carrier Connections securely sends new enrollments, changes and terminations from ADP Workforce Now directly to the carriers you choose.¹

Features and Benefits

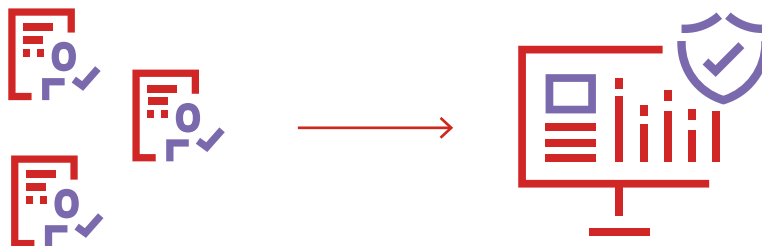

- Helps avoid unnecessary benefits and premium payments
- Reconcile benefits invoices based on enrollment data
- Save time and improve accuracy with automatic syncing of employee benefits and enrollment information to your carrier
- Reduce the risk of costly data entry errors

Getting started is as easy as 1-2-3

Configuring connections to your carriers is simple. Once you select which carriers you would like to connect with your ADP Workforce Now solution, there are three simple steps:

- 1 Choose carriers and receive their approval
- 2 Provide ADP with group information, carrier contacts and assist with our review
- 3 Maintain updates until connection goes "live"²

Our ADP integration services team will work closely with you and your carriers to configure and test the connections and validate all data before the connections are finalized. Configuration of the connections begins once benefits plans are established, enrollments are loaded and ADP has received the account structures from your carriers.

1. Carrier Connections is not available with all carriers, and carriers may approve or deny based on their own criteria. If approved, additional fees may apply. Please consult with your ADP representative.

2. Depending on the type of connection to your carrier, implementation timeframes vary. APIs connections can be implemented in days, EDI connections take several weeks.

Coming soon — real-time carrier connections

Save time, minimize errors through real-time connections with top carriers

ADP Workforce Now seamlessly integrates with several of the top benefit carriers, streamlining the exchange of data for plan setup, enrollment and billing. Your HR and finance teams will no longer need to manually enter benefit plan information and maintain it across multiple systems, saving time and dramatically reducing the chance for errors.

Faster and easier plan setup

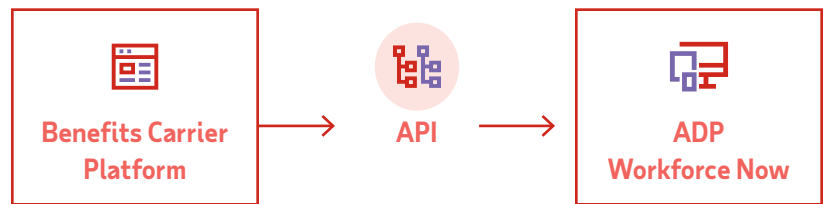

The plan setup API leverages real-time connections to retrieve benefit plan setup including plan details and rates from the benefits carrier to ADP Workforce Now® — saving time and eliminating errors. The work is done for you, from initial case setup to updates at renewal.

Real-time eligibility updates

The enrollment API enables secure, real-time transmission of employee election information from ADP Workforce Now to the carrier system. The result is more accurate member coverage, billing and payroll.

With the next generation of ADP Workforce Now, you can rely on a more intuitive, insights-driven benefits experience for everyone in your organization. An improved benefits experience makes life easier for everyone!

Key benefits for employers and employees

Saves time and effort — can be as much as 200 hours per year

Increases data accuracy and eliminates errors due to timing delays

Reduces benefits administration setup time from weeks to minutes

Employees receive accurate and timely access to their elected benefits — no data or eligibility transfer delays
